EDUCATION

Sri Venkateswara College of Engineering	Tirupati, India
B-Tech-Computer Science and Engineering	July 2025-Present
Chaitanya Bharati Institute of Technology	Proddatur, India
Diploma-CSM (marks %):91	August 2022 - April 2025

SKILLS SUMMARY

• Design & Prototyping:	Figma, Adobe XD, Canva
• Front-End Technologies:	Html, Css, JavaScript, Php
• Back-End Technologies:	Python, Node Js
• Tools:	GitHub, Notion, Miro, Figma, Framer
• Soft Skills:	Collaboration, Communication, Empathy, Problem-Solving
• DataBases:	Mysql, DBMS, Nosql

PROJECTS

Examination Cell Link	October 2024
---	--------------

Role: Developer | Technologies Used:PHP, MySQL, HTML,CSS, etc.)

Developed a comprehensive Exam Hall Management System designed to automate the manual process of exam hall allotment, seating arrangement, and invigilator assignment within a college environment. The system ensures seamless, clash-free hall allocation for students and provides staff with an efficient interface to manage examination logistics.

Key Features & Contributions:

- Designed and implemented modules for managing teachers, students, subjects, classes, room types, halls, and exams.
- Automated hall allotment and seating arrangement, eliminating manual Excel-based processes.
- Implemented invigilator allocation logic to assign staff to specific examination halls.
- Built a dynamic Dashboard to provide real-time information on exams and hall statuses.
- Developed User Management & User Permissions features for secure, role-based access.
- Created Report Management to automatically generate essential reports such as Today’s Exams and Exam Summary Reports.
- Added system-wide configurations through Appearance Settings and Email Management.

CERTIFICATIONS

Google for Startups – Prompt to Prototype CERTIFICATE	December 2025
---	---------------

Program – Offered by Scaler

Completed an intensive program designed to help innovators transform AI-driven ideas into functional prototypes. The program emphasized practical prompt engineering, product ideation, MVP development, and rapid iteration workflows.

- Learned framework-based approaches for converting problem statements into validated product concepts.
- Applied advanced prompt engineering techniques to build AI-assisted features and automation flows.
- Collaborated with mentors and industry experts to refine product direction and improve usability.
- Gained exposure to startup methodologies including user research, value proposition design, and early-stage validation.
